

APRIL 2026

### A MESSAGE FROM OUR LEADERSHIP TEAM

Dear Parents, Students, and Staff,

As we move into April, our school community is entering an important stage of the academic year. Students are preparing for their Semester Two Examinations, while our Year 12 students are also getting ready for the SACE External Examinations this month.

At this time, the value we would like to emphasise is Resilience. Resilience is the ability to keep going, even when things feel challenging. It means staying focused, learning from difficulties, and continuing to do your best step by step.

For students, resilience can be practised in simple but meaningful ways each day: following a study plan, revising consistently, asking for help when needed, and taking care of your health and well-being. These habits are especially important during exam preparation.

To all students, we wish you every success in your upcoming examinations. We encourage you to try your best, make a clear revision plan, use your time wisely, and reach out to your teachers whenever you need support or guidance.

To our Year 12 students, we wish you every success in your SACE External Examinations. We are proud of your hard work and encourage you to stay calm, trust your preparation, and keep moving forward with confidence.

The school also thanks our teachers and parents for their continued support and partnership during this important period.

Let us continue to practise Resilience each day in the way we learn, grow, and face challenges together.

Warm regards,

## INSIDE THIS ISSUE

- A MESSAGE FROM OUR LEADERSHIP TEAM
- LOOKING BACK : MARCH 2026
- KEY ANNOUNCEMENT FOR APRIL 2026
- RADI - RAHI : ACHIEVEMENT

### LOOKING BACK : MARCH 2026

March concludes with a vibrant series of learning activities and extracurricular experiences, providing our students with diverse opportunities for holistic development—from academic mindset to physical health and practical skills.

Pi Day (March 14): Our whole-school community engaged in a series of immersive Mathematics challenges. Moving beyond traditional textbooks, students applied logic and collaborative problem-solving to tackle real-world "Pi-themed" puzzles.

Inter-Campus Sports Tournament: The competitive spirit was palpable at both our Saigon Center and West Saigon campuses. Through football, pickleball, and invasion games, students not only enhanced their physical fitness but also demonstrated exceptional sportsmanship and teamwork.

We are thrilled to celebrate the remarkable achievement of Nguyen Tran Khoi Nguyen, who earned a gold medal at the World Mathematics Championships. This prestigious accolade is a testament to his intellectual caliber and unwavering dedication.

To conclude the month, our Primary students from the Hoa Binh campus embarked on an enriching field trip to Profarm. By stepping into the shoes of "young farmers," they explored nature through hands-on activities, fostering a deeper connection with the environment.

## KEY ANNOUNCEMENT FOR APRIL 2026

As we transition into April, our whole-school community officially enters the most critical academic phase of the year. This period is dedicated to final assessments, examinations, and celebrating the culmination of our students' hard work.

### SACE Examinations – A Milestone for Year 12

From April 9 to April 15, our Year 12 cohorts will sit for their SACE examinations. This represents a pivotal moment in their three-year academic journey, marking the transition toward their future aspirations. Concurrently, students from years 8 to 11 will undergo their semester 2 final assessments according to their personalized schedules.

### Closing Ceremony and Graduation

Following the rigorous examination period, the school will host a series of commemorative events:

#### End-of-Year Ceremony

Scheduled for May 6 at both our Saigon Center and West Saigon campuses to celebrate our students' collective achievements.

#### Graduation Ceremony & Performance:

This prestigious event is set to take place on May 7th. Detailed information will be sent to parents through official school channels at the earliest convenience.

## RADI - RAHI : ACHIEVEMENT

This month, our school has been deeply committed to fostering Achievement—one of the core pillars of the RADI RAHI framework — with emphasis on fostering academic agency and enhancing students' self-awareness.

#### DEFINITION:

Students strive for academic achievements based on individual and collective goals, fostering a dynamic and positive learning environment.

#### KEY ACTION:

Through a series of intentional initiatives during Homeroom sessions, teachers and students set both short-term and long-term learning goals. Students then develop strong self-assessment skills, learn to identify their individual goals, and refine their study strategies to support their personal growth.

#### 5 WAYS PARENTS CAN SUPPORT GOAL ACHIEVEMENT

**Collaborative Goal Setting:** Work with your child to define clear objectives tailored to their individual potential and academic aspirations.

**Encourage Self-Reflection:** Guide your child in reviewing their learning journey, helping them recognize both their strengths and areas for further development.

**Action Plan Support:** Help your child deconstruct larger ambitions into manageable, actionable steps.

**Monitor & Pivot:** Regularly check in on their progress and encourage them to adjust their strategies if challenges arise to stay on track.

**Celebrate Milestones:** Meaningfully acknowledge and validate their efforts. Recognizing progress is key to sustaining long-term motivation.
